HOME & LIFESTYLE

House and garden products and everyday goods must look unique and retain their function over a long service life. The GABRIEL-CHEMIE Group ensures that the required material properties are achieved and we offer additives to secure product functionality and exceptional colour creations.

COMPETENCE IS OUR STRENGTH

Antistatic-, antimicrobial-, UV- and flame-retardant additives increase the service life and handling safety of your products. Heavy-weight compounds, laser-marking additives, additives for improving scratch-resistance and special polymer carriers e.g. POM or PLA give your products their USP.

APPLICATIONS

SPORT & LEISURE

Design, form and colour determine your marketing success and are of primary importance. We support you here with our innovative and creative products.

ARTIFICIAL TURF & STADIUM SEATING

Our high-quality and continuously developed combination masterbatches help you to optimise the costs of your production process and ensure that your products are long-lasting and functional.

FURNITURE & GARDENS

We record sunlight data and adjust dosage recommendations accordingly for UV stabilisation.

ELECTRICAL AND ELECTRONICS INDUSTRY

Visually attractive housings are an unmistakable trademark. We help you to realise your ideas with our extensive colour- and effect masterbatches.

HOUSEHOLD PRODUCTS

We offer you attractive colours which communicate freshness and appeal and bring change into the everyday lives of consumers.
